

**NEW ECLIPSE[®] PROBE COVER - LATEX-FREE
AND SIZED FOR 3D/4D ULTRASOUND PROBES**

Parker Laboratories now offers a new ECLIPSE[®] Probe Cover designed to fit 3D/4D probes and transducers. Just like our original, the Eclipse 3D is made of pliable, latex-free, polyethylene film, and is pre-gelled with Aquasonic[®] 100 Ultrasound Transmission Gel.

The Eclipse 3D will easily slip over a 3D/4D probe or transducer. Use one probe cover for each procedure to provide cost-effective protection. The Eclipse 3D is economically priced and is packed 100 per box.

Eclipse 3D Probe Covers are available through medical supply distributors, or through Parker Laboratories. Please visit www.parkerlabs.com/eclipse.html for more information on Eclipse 3D or www.parkerlabs.com for information on any of our other fine products.
