

ALCOHOL-FREE PROTEX™ DISINFECTANT SPRAY
NOW AVAILABLE IN 32 FL OZ TRIGGER SPRAY BOTTLES

Parker Laboratories has expanded on its Protex brand through the availability of the product in a 32 FL OZ trigger spray bottle.

PROTEX is a powerful, one step disinfectant effective against a broad spectrum of pathogens, including Influenza Type A (H1N1), MRSA, Staph, HIV, and many others viruses, bacteria, and fungi. Protex is ideal for disinfecting ultrasound transducers and probes, mammography compressor plates, nonporous athletic and wrestling mats, exercise equipment, training tables, stainless steel and vinyl and plastic upholstery. Although powerful against a broad spectrum of microorganisms, Protex is alcohol-free, making it gentle for sensitive equipment and is EPA approved.

Protex Disinfectant Spray is available through medical supply distributors, or through Parker Laboratories. Please visit www.parkerlabs.com/protex.html for more information on Protex Disinfectant Spray or www.parkerlabs.com for information on any of our other fine products.
