

**PARKER LABORATORIES, INC. ANNOUNCES ITS
ACQUISITION OF INNOVA CORPORATION**

*Synergies in Company Specialties Proves to be the Catalyst for Acquisition
and the Key to Future Market Penetration*

Fairfield, New Jersey – Parker Laboratories, the world-leading manufacturer of electromedical contact media, announced its acquisition of the Innova Corporation of New Hartford, Connecticut. Innova specializes in the manufacture of custom-designed, flexible disposable devices for the medical industry, such as, electromedical, wound care and specialty OEM products.

“The acquisition of Innova will allow us to transcend what we have accomplished as individual companies and, as a market leader, continually reinforce and reinvent our business,” said Parker Laboratories President Neal Buchalter.

Innova is ISO certified and FDA registered for medical devices and drug delivery applications.

Since its inception in 1958, Parker Laboratories has been consistently positioned at the forefront of innovations that advance the ultrasound and electromedical industries. Parker’s flagship product, Aquasonic® 100 Ultrasound Transmission Gel, is the world standard for medical ultrasound.
