## **MEDICAL ULTRASOUND PIONEER EXPANDS NEW JERSEY-BASED FACILITIES**

Fairfield, New Jersey – Medical ultrasound global leader Parker Laboratories, Inc. announces the relocation of its corporate offices and finished goods warehousing to 4 Sperry Road, while current manufacturing facilities are expanded at 286 Eldridge Road, both slated for completion in January 2018.

The move and expansion increases Parker's footprint from its current 40,000 sq. ft. to more than 95,000 sq. ft., plus its international operations headquartered in Almelo, The Netherlands. This, all in response to increasing worldwide demand for current products in Parker's portfolio, as well as in anticipation of new product launches in the coming year.

Now in its 60th year, Parker Laboratories has been consistently positioned at the forefront of technological advances that characterize the ultrasound and electromedical industries. Parker's flagship product, Aquasonic® 100 Ultrasound Transmission Gel, is the world standard for medical ultrasound.
