More

3T is a fully featured, cloud-based compliance platform that pairs seamlessly with Tristel ULT to revolutionize your device reprocessing workflows.

This integrated solution elevates record-keeping and traceability to new heights, offering an indispensable tool for healthcare facilities prioritizing safety and efficiency.

Administration

Through an interactive web portal, 3T provides administrators the autonomy to simply and quickly setup and maintain their organization.

Dashboards

3T enables organizations to visualize user interactions and their use of products, medical devices and clinical settings in a friendly and effective way.

Scanning

The mobile app adopts a 'scan first' approach, where users can fast track each process, from initial login to logging crucial product and medical device data.

Localization

In the same way Tristel products are globally recognized and widely used, 3T has been developed to cover regional data protection requirements.
